DETAILED ACTION

This office action is in response to application filed on 12/03/03. Claims 1-30 are still pending in this application.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-30 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. Independent claims 1, 11, 21, 28, and 30 along with their corresponding dependent claims recite "automatically providing information to remotely access a web page". Examiner submits that remotely accessing a web page is missing in the specification. On page 5 of the specification it is stated that the client agent automatically initiates a chat session via an Internet Reply Chat (IRC) channel. The chat session sets up a text communication via electronic mail between the client and the help server. The client agent initiates an automatic refresh that recalls the subject page and assists the client agent in forwarding the appropriate information to the help server. Nothing in regard to remotely accessing web page was discussed.

Response to Arguments

Applicant's arguments filed 05/17/2004 have been fully considered but they are not persuasive.

Applicants argued that Price does not teach a web page and remotely accessing a web page in request for help by a client.

Examiner respectfully submits that Price reference, which was interpreted broadly, discloses all the limitations of the applicant's invention as claimed (see prior office action for details). Furthermore, it must be noted that the limitations, which applicants are relying upon have no support in the specification. Applicant is requested to review the claims and the specification in order to make appropriate correction

Applicants also argued that with respect to the enablement matter, the specification has provision that supports the claims' limitations (see page 3 line 1-5 and page 4, line 18).

Examiner has thoroughly went to the pages and lines applicants are referring to. Unfortunately, Examiner was not able to interpret anything regarding those references that could suggest "automatically providing information to remotely access a web page". Accordingly, the 112 rejection is maintained.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not

Art Unit: 2151

mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
